MESSAGE

We took up the responsibility of bringing the *Akanksha* with much more vigour on the occasion of the Sri Venkateswara Institute of Medical Sciences (SVIMS) celebrating its 29th Anniversary.

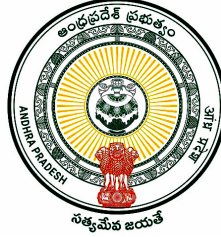

With the blessings of Lord Venkateswara and Goddess Padmavathi, the SVIMS Sri Padmavathi Medical College for Women is making progress in every sphere of our mandate. I sincerely thank the Director cum Vice-Chancellor for giving me the task of shaping *Akanksha*.

SVIMS achieving NABH recognition has been a moment to cherish. I also congratulate all the Faculty, Staff and students of the institute for the hard work put in to achieve this major achievement

I wish you all the very best and wish the Anniversary function a grand success.

In service of Lord Venkateswara

MESSAGE

With the blessings of Lord Balaji, we are making progress in every sphere of our mandate. My thanks to all of you for another successful year i.e. celebrating its 29th Anniversary on 26th February 2022.

I am very proud to see that SVIMS starting as a small medical institution in the year 1993 and developments and achievements made during all these 29 years in establishing SVIMS one of the reputed medical institutions not only at state level but also at national level. The academic progress made by SVIMS in all these 29 years by starting many super and broad speciality courses, para-medical and nursing courses and adding to that starting of MBBS in the year 2014 are highly commendable. The Tirumala Tirupati Devasthanams hitherto helping this institution in all aspects through the effective "NINE" initiatives and will also help SVIMS in all its future endeavours.

I am also happy to see the efforts of SVIMS faculty and its Director cum Vice Chancellor in providing better health care to the needy and poor patients

I congratulate the faculty and other staff members and students on the occasion of 29th Anniversary celebrations.

Chairman, TTD Board

24th February, 2022

MESSAGE

My delighted greetings to Sri Venkateswara Institute of Medical Sciences (SVIMS) which is celebrating its 29th Anniversary Day on February 26 and also releasing its Magazine "AKANKSHA 2022" on this momentous occasion.

Ever since its inception in 1993, SVIMS emerged as a Super Specialty Hospital and is marching ahead to become "Centre of Excellence" in Medicare, Education and Research with a profound vision of human service.

The incredible services and medicare by SVIMS fraternity, especially in the last two years during the time of Corona Pandemic in providing treatment to the COVID-19 patients by converting Padmavathi Medical College as a "State Covid Hospital" with the support of the Government of Andhra Pradesh/TTDs, has won laurels from all quarters.

It is heartening to learn that in the year 2021, SVIMS served 4,06,353 out-patients and 41,937 in-patients; performed 11,351 surgical procedures and carried out 33,21,346 investigations.

Your outstanding contributions to the society by successfully treating several poor suffering from chronic diseases under Sri Venkateswara Pranadana Scheme initiated by TTD for better medical care are praiseworthy.

My Congratulations to the Director, Doctors, Students and the strong work force of SVIMS, who have earned unique recognition by virtue of their hard work and wish that the Institute to serve the needy with more vigour and expand further with the blessings of Lord Venkateswara.

In the service of Lord Venkateswara

Dr. K.S. JAWAHAR REDDY

REVENUE DEPARTMENT
Government of Andhra Pradesh

MESSAGE

At the outset, I congratulate the faculty members and other staff of SVIMS on the occasion of 29th annual celebrations to be held on 26th February, 2022.

SVIMS was established with a view to provide advanced medical care to the poor and needy patients apart from imparting training to the students in various fields of medicine. It is noteworthy that SVIMS is taking a right path to reach its tasks and goals with utmost service by utilizing latest technology and providing best services to the patients. I hope that medical education and training providing by SVIMS to the students are transformed from knowledge based education to competitive base education and solving critical clinical solutions to meet the needs of the society more effectively. I am glad to know that SVIMS got certificate from **National Accreditation Board for Hospitals & Healthcare Providers**.

The 'Akanksha' Souvenir serves like a mirror image of the institution and stands as a mark of representation to its parent institute. I hope that this souvenir reaches very well and enjoy by the readers.

May the Lord of Seven Hills shower his blessings on SVIMS for further growth and all success in its future endeavours.

(DR.G.VANI MOHAN)

Dear Dr.B.Vengamma,

I am happy to note that Sri Venkateswara Institute of Medical Sciences, Tirupati family is conducting 29th Anniversary Day Celebrations on 26th February, 2022 and releasing the institute Magazine "AKANKSHA 2022".

In this connection, I wish to inform that SVIMS is providing the most advanced medical technology to the poor and needy people with the blessings of Lord Venkateswara Swamy. The Institute has developed research activities in modern medicine and other allied sciences including inter-disciplinary fields of physical and biological sciences. The Institute has conducted many schemes successfully and these are helpful for medical research activities.

I wish the Director, Faculty, Staff and Students of SVIMS, the function to be a grand success and I wish all the best to the future endeavors.

With Best Wishes,

Yours sincerely,

(DR.P.SHYAM PRASAD)

“We want education by which character is formed, strength of mind is increased, the intellect is expanded, and by which one can stand on one’s own feet” says Swami Vivekananda. Putting in another way, education must aim at bringing about balance in all the faculties – physical, mental, emotional, social and spiritual; for overall wellbeing of individuals.

Education is not just about books, exams, results, competition, employment, income and retirement. If education is identical with information alone, then the libraries are the greatest sages in the world and encyclopaedias are the Rishis. Modern day education focuses mainly on mental component forgetting the other components, resulting in increased psychological disturbances among the educated. Mind has lost its path and is wandering all over in all the possible ways. There should be something done practically to discipline the mind which governs our entire life. How can a turbulent and chaotic mind help in one’s development? How to bring back the lost balance in us?

We all know that everything starts with the mind. The solution would be to regulate mind using the principles of Yoga. This practical science needs to be inculcated as a part of our education system in order to strengthen the human being in all its aspects. I am happy to share that SVIMS has been actively involved in conducting programs related to Meditation and Yoga for students of allstreams for the past couple of years. Recent guidelines of National Medical Commission also mandate Meditation and Yoga as part of curriculum to medical students across the country. This is a welcoming sign emphasising the need to inculcate the basic principles of Meditation and Yoga into our daily routine. Hope the students get benefitted by such programs offered at SVIMS for their overall development in all their future endeavours.

My best wishes to all the students on the Eve of 29th Anniversary Day of SVIMS.

Dr. V.VANAJAKSHAMMA

From the Desk of the Executive Editor

I proudly announce that the e-book of “AKANKSHA” being released during the SVIMS UNIFEST-2022 is a notable edition brought forward with the support of the Honorary Editor-in-chief and other members of Editorial board.

“AKANKSHA” designed digitally with a vision to quench the literary thirst of SVIMS Family by laying a platform for innovative ideas on the occasion of celebration of 29th Anniversary Day of Sri Venkateswara Institute of Medical Sciences on 26th February, 2022.

I congratulate the team of NABH for achieving Accreditation. Under the able leadership of our beloved Director-cum-Vice chancellor, Dr B Vengamma, our institute is progressing by leaps and bounds. The appointment of Dr Alladi Mohan as Dean, an academican par excellent, has further strengthened all academic activities of the institute.

I thank the entire editorial board and all those who contributed to the magazine.

Once again best wishes to all, may lord Venkateswara bless us with health and happiness.

Dr Sharan B Singh. M

Executive Editor & Principal, SVIMS-SPMCW

**SRI VENKATESWARA INSTITUTE OF MEDICAL SCIENCES

TIRUMALA TIRUPATI DEVASTHANAMS**

MESSAGE

I am delighted to note that our institution has witnessed a steady progress in providing the best patient care by setting standards in excellence of medical care, imparting medical education, research and patient outreach programmes. The progress of SVIMS over a period of 29 years has been incredible and I am very happy to inform that, SVIMS is celebrating its 29th Anniversary on 26th February, 2022.

On this occasion, I extend my gratitude to all the members of SVIMS family in carrying out the excellent work all these years to propel institution to the new heights fulfilling the objectives of the institution. I sincerely thank the Government of Andhra Pradesh, and Tirumala Tirupati Devasthanams for their continuous support.

Further, I congratulate all the staff members of SVIMS family for the efforts put in for facilitating SVIMS achieve the prestigious “Certificate of Accreditation” from National Accreditation Board for Hospitals & Healthcare Providers (Constituent of Board of Quality Council of India).

I hope that, the “Akanksha” magazine will bring out the hidden talents of students, faculty and staff of SVIMS and reflect them in versatile abilities. I wish the anniversary celebrations a grand success.

Further, I congratulate the Honorary Editor-in-Chief, the Executive Editor and the Editorial Board for bringing out another notable edition of Akanksha.

In service of Lord Venkateswara
Director-cum-VC

SRI VENKATESWARA INSTITUTE OF MEDICAL SCIENCES

Alleviating human suffering has been part of dedicated services of Tirumala Tirupati Devasthanams to mankind. To provide the most advanced medical services to the needy, the TTD has launched a monument, a blessing from the lord by opening Sri Venkateswara Institute of Medical Sciences, an AIMS (New Delhi) – like institute at Tirupati.

SVIMS was conceived in 1986 on the lines of AIMS, New Delhi and foundation stone was laid on 18.4.1986 by Late Sri. N.T. Rama Rao, the Hon'ble Chief Minister of Andhra Pradesh in the world famous pilgrim town of Tirupati. It was established with a view to provide Super Specialty facilities at nominal cost to the poor.

SVIMS Hospital started functioning from 26.2.1993. The institute was upgraded in 1995 to the level of university by an act of AP State Legislature, within a short time of its establishment.

The healing touch of SVIMS has covered most of Andhra Pradesh and neighbouring states. The major objectives of SVIMS include service, training and education in advanced medical sciences and technology. Latest technology in diagnostics and total computer automation of patient care has been implemented in this institution. The computer centre is equipped with high speed internet access.

The new central library started functioning from February 2017. The students and faculty are allowed to access high quality medical journals and literature.

Apart from Health care the institute offers several academic programmes in Modern Medicine, Physiotherapy, nursing basic medical sciences, biotechnology, bioinformatics and other Allied Health Sciences. SVIMS is one among the few institutes in the country running 10

super speciality and 10 Broad Specialty courses starting from the academic year 2003-04 onwards with the permission of Medical Council of India.

SVIMS-Sri Padmavathi Medical College for Women in its seventh year of functioning with intake of 150 students for every year is one of the premier institutions in Andhra Pradesh with good teaching faculty, infrastructure, latest equipments and imparting well organized and advanced teaching and training to the students. The

college building was formally inaugurated by the then Hon'ble Chief Minister of Andhra Pradesh on 16-12-2016. The present students' strength is 800 with an intake of 175 students from the academic year of 2019-20 onwards, due to hike of 25 seats as to implement of EWS category reservations. For the fresh MBBS batch for the Academic Year 2021-22, the admission process was already commenced.

The recognition of MBBS course of SVIMS-Sri Padmavathi Medical College for Women for award of MBBS degree (150 students) granted by SVIMS University on or after January, 2019 was approved by the Board of Governors in Supersession of Medical Council of India u/s 11(2) of the IMC Act, 1956 vide Endst.No.MCI-34(41)(R-6)/2018-Med./187199, dated 13-03-2019.

The newly constructed Sri Padmavathi Medical College hospital with 650 bed strength was inaugurated by the Hon'ble President of India, Sri Ram Nath Kovind on 01-10-2017. The then Hon'ble Chief Minister of Government of Andhra Pradesh Sri Nara Chandrababu Naidu and the then Hon'ble Governor of Government of Andhra Pradesh and Telangana, Sri E.S.L. Narasimhan also attended the inaugural function

The OP & IP services in the specialties of General Medicine, General Surgery, Obstetrics & Gynaecology, Paediatrics, Ophthalmology, E.N.T, Dermatology, Dental Surgery, TB & Chest and Psychiatry are presently being run in the new hospital building developed by APMSIDC with an estimated cost of Rs.98.86 crores.

Svims- Sri Padmavathi Medical College Hospital, Tirupati is declared as state COVID Care hospital

The MBBS girl's hostel was inaugurated by Hon'ble Vice-President of Government of India, Sri M. Venkaiah Naidu on 07-08-2017. The hostel for MBBS women students 144 rooms (72 rooms single occupancy and 72 rooms triple occupancy) and supporting facilities. The hostel building was constructed with an amount of 16.4 crores and the 2nd block MBBS hostel construction work is in progress.

The faculty are actively involved in research activities with the financial assistance of national and international agencies.

Cfar Building: The Centre for Advanced Research building estimation of Rs.7 crores and equipment worth Rs.13,97,468/- This centre will cater to the needs of faculty and students used and they can utilize the facilities available at this centre for their research programme.

The pink bus was inaugurated on 28-12-2018 with an estimation of Rs.2,01,60,000/-. This mobile bus having the facilities of mobile mammography, gyn exam/ PAP smear, oral examination, breast ultrasound, educational video on cancer prevention, patient counselling and will screen for breast cancer and the women not only in the villages but also in the remote areas can use these facilities for cancer screening and further treatment. This mobile unit will provide the services during free medical camps conducted by SVIMS at free of cost.

The new play ground at the behind SVIMS- SPMCW has been renovated on 24.01.2021. All the sports events are conducted in the new ground.

The Tirumala Tirupati Devasthanams brings one of the holiest offerings ever the “Sri Venkateswara Pranadana scheme. Blessed by

everything the Lord Himself stands for Sri Venkateswara Pranadana Trust

aims at proving succour to the needy and suffering by offering them free medical care at the Tirumala Tirupati Devasthanams run hospitals.

SVIMS continued to stand in first place under the Dr.YSR Aarogyasri Scheme in the entire state under “Best Performing Government Hospital” category.

Objective of the Institute:

To create a centre of excellence for providing medical care, educational and research facilities of a higher order in the field of medical sciences in the existing super specialties and such other super specialties as may develop in future, including continuing medical education and hospital administration.

To develop patterns of teaching in post-graduate level and in super specialties so as to set a high standard of medical education.

To provide for training in para-medical and allied fields, particularly in relation to super specialties, to function as a referral hospital.

To provide for post-graduate teaching and conduct of research in the relevant disciplines of modern medicine and other allied sciences, including inter-disciplinary fields of Physical and Biological Sciences.

PARADOX

Paradox: A statement or proposition which, despite sound (or apparently sound) reasoning from acceptable premises, leads to a conclusion that seems logically unacceptable or self-contradictory (1) and it appears unless and until we don't know the depth in it.

THERE IS NO WORD CALLED PARADOX IF WE FIGURE OUT THE MISSING DETAILS IN IT.

Types of Paradoxes:

1. Subjective paradox
2. Objective paradox

Subjective paradox: Formed due to misinterpretation or misplacement of important details regarding the situation

Objective paradox: Formed Due to perpetual motion, which is impossible to create in a four-dimensional world. It's just an illusion created by an artwork.

There are no objective paradoxes existing in a real-world

So now, only subjective paradoxes are present.

Why subjective paradoxes will occur?

Subjective Paradox will occur when we wrongly interpret the situation or we miss any important details, these subjective paradoxes will occur.

Famous paradox

1. Ship of Theseus paradox
2. Paradox of court
3. Omnipotent paradox
4. Bootstrap paradox
5. Grandfather paradox

1. **Ship of Theseus paradox:** Suppose Assume, A ship of Theseus is made up of ten parts, If you replace one by one and completely replace all the ten parts, with all the replaced ten parts, we can make a ship, right! So the question is which is the original ship of Theseus? Replacement ship or replaced ship? (2)

Solution: when the question is about identity, like who are you? You have to answer or show your structure abilities or impacts or thoughts or achievements or work done with respect to its space-time. So the answer should be Structural and functional abilities with respect to the sailing time of each part So by applying this principle After replacing the 10th part both the ships are homologous to each other, but none of the ships would match the identity of the ship of Theseus at any given point of time. Because of the difference in the sail-time of each individual part.

In simpler words, If the Structure and function of A+B+C+D+E+F+G+H+I+J and the SAIL TIME of A+B+C+D+E+F+G+H+I+J Parts are equal until, just before the replacement of a first part, and thus the original identity for the ship of Theseus, after replacement of all TEN parts, the two ships are structurally similar, but both of them missed their identity with the original ship of Theseus. Because of the difference in their sail-time of each individual part. (3)

2. **Paradox of Court:** Assume there are 2 persons A and B, A is the advocate, B is the Trainee After successful completion of the course by a trainee, he has to pay the amount after winning the first case, as a fee for his training, this is the bond between them, but unfortunately trainee won't take up any cases, after some time, the advocate sued a case on the trainee, regarding his fee amount If Trainee won the case, He has to pay the amount, because of the bond between them If Trainee loses the case, Again he has to pay based on the court orders. (4)

How do you solve this case?

Solution: So I appoint one of my friends as my advocate, As matters of freedom, It's purely my wish, whether to take up any case or not, so now the case was dismissed, and I won't pay any amount to the even after winning the case Because I won the case as a respondent, not as an advocate. Because my friend was my advocate, and I am the respondent.

The important detail missed in this paradox was, at the time of the agreement, the trainee has to ask, to mention the side of winning too, like winning as a lawyer or as a respondent/petitioner.

3. **Omnipotent paradox:** Can an omnipotent being create a stone so heavy, that they can't lift it? (5)

SOLUTION: The paradox arises, because of failing to mention the level of omnipotence

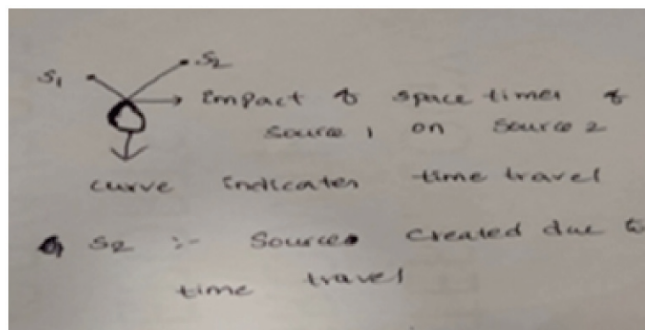

According to holy books, God will be formless, omnipotent, and omnipresence, but the point of negligence is WHERE? That is, Where God will be as formless, omnipotent, and omnipresence? AT WHAT LEVEL?

Answer: Definitely God is formless omnipotent and omnipresence, BUT ONLY ABOVE THE LEVEL OF UNIVERSE and these kinds of things or events such as stone, lifting force, gravity, plane, acceleration, buoyancy forces these all are confined to at the level of the universe, so we can't compare the items between two irrelevant things. So If God comes to the level of the universe, definitely they'll lose their omnipotence and omnipresence. And they must have to follow the path of nature set by them.

EX: $1+1=2$, based on NEWTON's The PRINCIPIA MATHEMATICA or SUN RISES IN THE EAST BASED ON THE OBSERVATION FROM EARTH, these all are universal facts, that means these statements will become truth, in this universe only, even god also can't change it. If the observer was present above the level of the universe, or in another universe definitely these facts also MAY change.

4. **Bootstrap paradox:** A Theoretical proposition in which, by means of either retro causality or time travel, a sequence of events is among the causes of another event, which is in turn among the causes of the first-mentioned event. Such causally looped events then exist in space-time, but their origin cannot be determined. (6)

Solution: origin can't be determined due to neglecting the impacts of one space-time on another space-time.

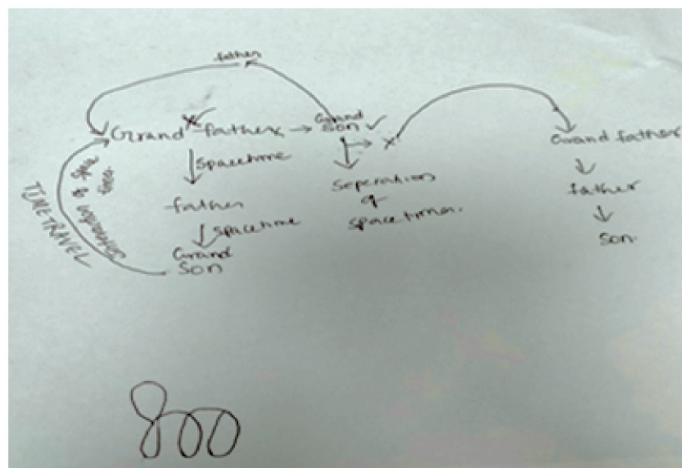

If you consider the level of impacts of two spacetimes one on each other, you will determine the real source, with respect to time.

In 2020 covaxin was discovered, which means up to 2019 there is no covid vaccine, and no coronavirus, if i knew the formulae for the covid 19 vaccine, and went back to 2019, i'll become the source for the covid 19 virus and its vaccine, because of impact of my space-time shows impact on covid virus as well as on bharath biotech.

Solution: here the point of negligence is the impact of one space-time on another space-time.

Grand father's paradox: the grandfather paradox is a paradox of time travel in which inconsistencies emerge through changing the past. The name comes from the paradox's description: a person travels to the past and kills their own grandfather before the conception of their father or mother, which prevents the time traveller's existence? (7)

Solution: this paradox arises due to the negligence of bootstrap paradox and interaction

When grand-son space-time interacts with his grand-father in this situation, there are multiple possibilities

1. If both are alive, there will be separation of their space-times, and grand father constitutes to his present spacetime.
2. If grandson is only alive, grandfather will be born to him, via his father (in a reverse direction) and constitutes to his present space-time
3. If grandfather is only alive, again it continues to present spacetime
4. If both are dead, there will be interaction of their space-time with other events in this universe, or with other universe which constitutes the same cycle again and again.

Shape of space time: based on this observation, the shape of space time may be presented as 8. But a small portion in it will appear as a linear or circular There is no word called paradox, unless and until we know the depth in it

By: **Dr M. Sreehari**
Tutor, Dept. of Microbiology

Fresher's Day

We entered the college with doubt in mind,
For only thanking god, that he was kind,
Enough to promise a government seat to us,
Though for some, the distance was too far to go by bus

The very first class, our names were asked,
And the professors greeted us but in a mask,
We had come away far from our home
To learn each day a new syndrome!
Though the spirits seemed like a 'T-Channel' indeed,
For we used to think twice before every deed

In the beginning, the lectures went in lifting our chin,
To accustom to the new gallery we were in,
Then suddenly the questions came bouncing all the way,
And we didn't have anything to say!
For they were ready to slay us through,
And all we had was no clue!

Our seniors had exams on their heads,
And I wonder who attacked their plate for the bread!
Well waiting for all of them to return,
To get some advice on how to learn

This year went away as quickly as mice,
And now it's indeed hard to realize
After tossing us in all directions it could
Knowing how circumduction is possible was for our good
Sandwiched between tests of all kinds,
Reading daily is the solution we did find!

From interacting with the great teachers we got,
And learning our duties from professors as they taught
We the first-year students have something to say,
Thank you to all our teachers, professors, and seniors for organizing this day!
It's our future that in your hands we do lay,
And we look towards you all to learn the right way!
Hoping we become good doctors like you
And inculcate in us the attitude, ethics, and communication that Monday mornings bring through!

Bhavna Pandey
1st Year MBBS

THE HOSPITAL WINDOW

Once upon a time, two men shared a hospital room. Now, one of these men was allowed to sit up for an hour every day. The other one, however, was on a complete bed rest. The one who was on bed rest couldn't even see the other man clearly. But he was glad to have someone around him.

The two of them were seriously ill, but they made pleasant conversations with each other. They would talk about their homes, jobs, family, friends and even what they would do when they leave the hospital. Every afternoon, at the same time, a nurse would come and help the other man to sit up. You may also like to read and every afternoon, this man would tell the other man lying on his back about the things that happened outside the window of the hospital room. There were new instances every day. The man who wasn't allowed to get up enjoyed this hour the best. "I at least get to hear what happens outside. Even though I can't go out, I feel alive," he would think.

From the talks they had, the man on his back knew exactly what the other side of the window looked like. "There is a small lake. And there are many ducks and swans. Many children come to sail their model boats. Also, there are many flowerbeds, with a variety of flowers. And young lovers walk arm in arm," the man on complete bed rest would think. He would also wonder how could he possibly thank the other man. It was that one hour that made this man want to live.

One afternoon, the other man described a parade passing by. But for some reason, the man lying in the bed could neither hear the marching or the drum beats. But he could imagine and for that he was glad. Days, months and weeks passed by like that. Then one morning the nurse found the man by the window had passed away. Even the nurses were saddened, but they soon took the body away.

Meanwhile, the man who had been on complete bed rest had been getting better. Then, when the time was appropriate the man asked to be transferred to the bed by the window. The nurse gladly did as he was asked. As soon as the man was comfortable, he propped himself up on an elbow to see the real world he been told of. But all he saw was a brick wall

outside the window. Then he asked the nurse that what could have forced the other man to lie to him. The nurse looked at him with a sad look and said, “that man was blind. Perhaps he only wanted to encourage you, in his own way.”

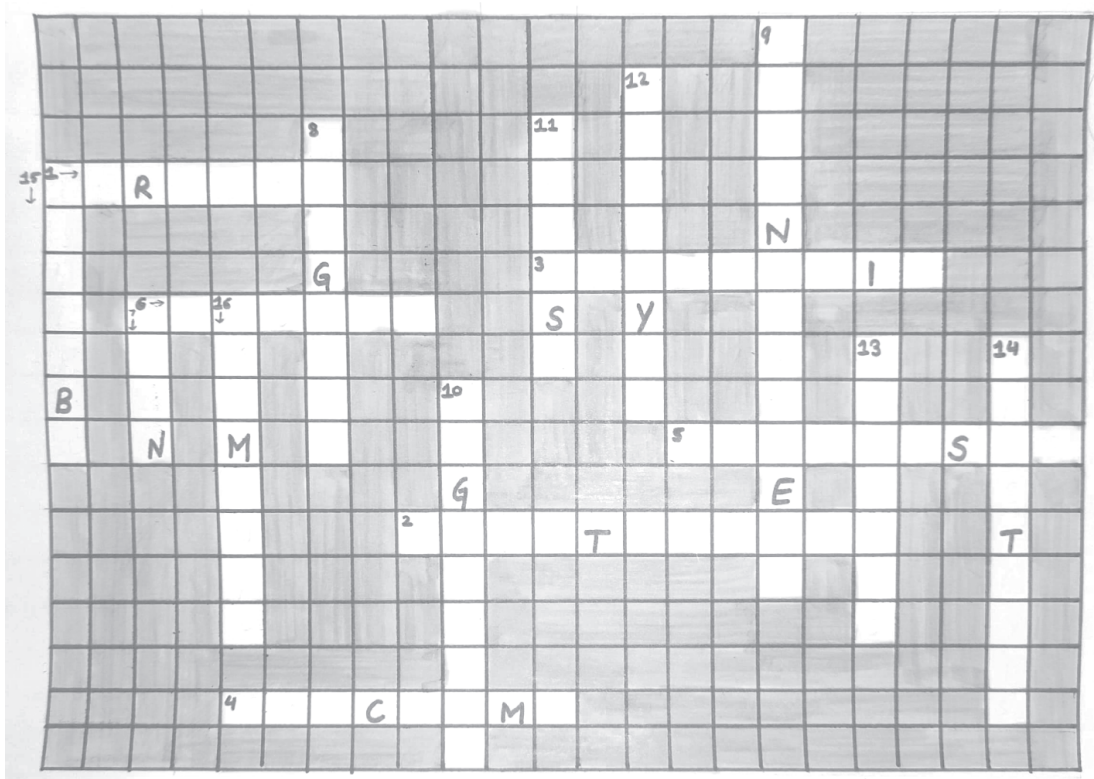

**MORAL OF THE STORY:DESPITE OUR SITUATIONS, WE SHOULD STRIVE
TO MAKE OTHERS HAPPY**

DEDICATION

- Ask the heart that always beats
- Ask the brain that never sleeps
- Ask the sun that shines each day and ask the stars every night they play
- Ask the child who always crawls and learning to stand holding the walls
- And the river that keeps on flowing the invisible winds that's always blowing
- They give us the perfect indication an example for dedication...

THE BEST SEED

There once was a farmer who grew the most excellent wheat. Every season he won the award for the best Wheat in his country.

A wise woman came to him to ask him about his success.

He told her the key was sharing his best seed with his neighbors, so they could plant the seed as well.

The wise woman asked, "How can you share our best wheat seed with your neighbors when they compete with you every year?"

"That's simple," The Farmer replied, "The wind spreads the pollen from everyone's wheat. If my neighbors grew inferior wheat, cross-pollination would degrade everyone's wheat, including mine."

"If I'm to grow the best seed of Wheat, I must help my neighbors grow the best wheat as well."

*If you want to live a meaningful and happy life, help others find happiness.

ముందు చూపు

ఒక అడవిలో ఒక పెద్ద మర్రిచెట్టు ఉండేది. అందులో రకరకాల పక్షులు నివసించేవి. వాటికి ఒక తెలివైన పక్షి నాయకుడిగా ఉండేది. ఒకరోజు అది పక్కమన్న రెండు చెట్లు ఒకదాని కొకటి రుద్దుకొని పొగ రావడం గమనించింది. తన గుంపులో ఉన్న మిగతా పక్షులతో “ఈ అడవిలో కారుచెట్లు మొదలయ్యి ఉన్నాయి. మనం ఇక్కడ నుండి వెంటనే వేరై ఉద్యానం వెళ్లిపోవడం తేమస్కరం” అని చెప్పింది.

కొన్ని పక్షులు దానికి బిష్టుకు - న్నాయి. కాని కొన్ని పక్షులు “మన నాయకుడికి చాదస్తం ఎక్కువ. గ్రీకంత్ దాన్ని కొండంత చేస్తాడు” అని నాయకుడు చెప్పిన మాటలను ఆశ్చర్య చేశాయి.

అడవిలో చెట్టుకు చెట్టు రుద్దుకొని చెచ్చు పుట్టింది. ఆ చెచ్చు ఎంతోమీస ఆకుల మిద పడి నిష్పంతుకుంది. అలా మొదలైన నష్టం అడవిలోని కొంత ప్రాంతాన్ని కల్చేసింది.

“ముందుచూపు” నాయకుని మాట విని తప్పించుకున్న పక్షులు ప్రాణాలను కాపాడుకున్నాయి. అదే లోకతాబుగా నాయకుని మాటలను ఆశ్చర్య చేసిన పక్షులు ఆ కారుచెట్టులో తమ

“అందుకే పక్షులను కాట్టకున్నాయి. చెప్పిన ముందుచూపు మాటలను ఖచ్చితంగా బోధించి ఎంతో మున్నెముక విడుదలమయ్యాయి.”
