**ON A
MISSION
TO BUILD A
CPR SMART
SOCIETY**

FROM DIRECTOR'S DESK

On this momentous occasion of India launching Ayushman Bharat (the new term being PMJAY– Prime Minister's Jan Arogya Yojana) SVIMS is making all efforts to provide equitable care with quality as the guiding principle. We are also on the march to create Happy & Healthy communities. Empowering communities with cardio pulmonary resuscitation skills is one program featured in this edition of Chronicle. The goal is to make every citizen of Chittoor to be a life saver!

Om Namo Venkatesaya!

Dr.T.S.Ravikumar
Director cum Vice Chancellor

MEGA COMMUNITY CPR PROGRAMME

With an intention to instill CPR knowledge in everyone SVIMS initiated Community CPR programme in December 2016. Starting the training programme with police personnel SVIMS actively engaged in educating the public about CPR and encouraging them to be 'CPR Ready' anytime, anywhere. More than 19,000 individuals in and around Tirupati are now CPR literate. SVIMS trainers, equipped with CPR manikins and expertise, visit different institutions, offices, industries to train people in their respective locations in CPR. 'Teaching, demonstrating and empowering the public to be CPR ready' is the objective of CPR training sessions.

SVIMS proposed this project in 'Gnana Bheri' to achieve maximum reach which got approval from the Chief Minister of Andhra Pradesh, Sri. N. Chandrababu Naidu garu. Creating Happy Communities through health is the articulated theme by Dr. T. S. Ravikumar for SVIMS projects under Gnana Bheri.

As a first step towards spreading this knowledge across Chittoor district, SVIMS, as per the directions of District Collector, Chittoor, organized a Mega CPR event at B. S. Kannan High School, Chittoor on World Heart Day -29.09.2018. Sri. P. S. Pradyumna, Collector, Chittoor was the Chief Guest of the programme. During the programme posters and pamphlets on CPR were released. "Cardio Pulmonary Resuscitation (CPR) is an essential knowledge that everyone should possess to save a life during emergency. Chittoor is the first district in the state to take up this initiative and we aim to make every citizen of Chittoor CPR Smart." said Sri. P.S. Pradyumna, Collector, Chittoor District during the programme.

Students practicing CPR at Community CPR Programme organized at B.S.Kannan High School.

Pradyumna and Municipal Commissioner, Tirupati, Sri. V. Vijayaramaraju practiced CPR on stage inspiring the students to learn the life saving technique.

“It is our goal that every citizen of Chittoor shall have the necessary skills, knowledge and readiness to help out any fellow human being requiring life saving procedure before the appropriate medical help arrives. I am indebted to our Chairman cum Chancellor Shri N. Chandrababu Naidu garu, and grateful for the dynamic stewardship of our District Collector Shri P. Pradyumna garu to enable us to launch the district wide Community CPR program on World Heart Day” said Dr.T.S.Ravikumar.

AT A GLANCE

SVIMS Community CPR Progress (June– September,2018)

-  **Sri Vidyanikethan Institutions**
Persons trained: 5000
-  **Sree Institute of Technology**
Persons trained: 200
-  **Siddartha Educational Academy**
Persons trained: 250
-  **Dravidian University**
Persons Trained: 450
-  **MNOs - TTD**
Persons Trained: 40

With 80 CPR trainers, SVIMS successfully trained 575 students, NSS Volunteers and Public Health Workers during the Community CPR event.

The CPR process was explained in 5 steps to all the students present in the programme. A demo was also given prior to training. Chittoor Collector, Sri. P.S.

With this approval received under Gnana Bheri, SVIMS is keen to take up this activity in entire Chittoor district and make every citizen of Chittoor an effective first responder. ‘Our goal is to empower all citizens to be first responders – to make our region CPR smart !’ according to Dr.T.S.Ravikumar.

SVIMS CPR trainers after successfully conducting Community CPR Programme

GNANA BHERI

SVIMS SHINES AT JNANA BHERI

SVIMS students (from left) Pooja, Lasya and Rishitha receiving award from Hon'ble Chief Minister of Andhra Pradesh Sri.N.Chandra Babu Naidu garu for their presentation on ‘Hands Only CPR’. Dr.T.S.Ravikumar, Director cum Vice Chancellor, SVIMS (second from right) can be seen in the photograph.

Government of Andhra Pradesh organized one day workshop, ‘Gnana Bheri’ on Global Competitiveness for the first time in Sri Venkateswara University’s Tarakarama Stadium on 04.08.2018. More than 15,000 students from different universities in Andhra Pradesh attended the interaction programme and many students gave presentation on different topics and received appreciation.

SVIMS Participation:

SVIMS initiated Community CPR Training Programme in Tirupati and has been working towards making everyone CPR Ready since 2017. In the past one and half years SVIMS trainers have been able to train more than 19,000 people in CPR. To make this life saving procedure reach everyone, SVIMS chose the big stage “Gnana Bheri” and successfully made a simple and yet impactful presentation on ‘CPR’ which received accolades from Shri Nara Chandra Babu Naidu garu. “SVIMS has shown a simple and practical solution to save a victim suffering heart attack. Learning and performing CPR can save millions of lives” said Sri. Chandra Babu Naidu garu during the programme, he also appreciated SVIMS for achieving good rank in NIRF ranking. SVIMS was appreciated for its initiative and was given the responsibility to spread CPR knowledge to every one in Chittoor and also take necessary steps to prevent smoking and alcohol addiction.

SVIMS also installed a CPR stall at Gnana Bheri to explain the CPR procedure practically to the visitors and guests of the workshop.

SVIMS VRDL AS A CRISIS MANAGEMENT CENTRE

Establishment of three tier virus research and diagnostic labs (VRDL) across the country under the 12th plan was to help coverage of the entire country for timely diagnosis/identification of viruses during outbreaks of epidemics, generation of data about viral diseases for facilitating quick deployment of resources & measures to save the human lives. SVIMS VRDL was established in the year 2015 and started testing the samples from the month of July. The lab has all the facilities to carry out serological and molecular testing of different kinds of viruses. At present the lab is testing around 20 types of viruses which can cause a spectrum of clinical illness. The main purpose of the lab is to carry out outbreak investigations which it does by going to the sites of outbreak as well as testing samples received in the lab.

Since its inception VRDL, SVIMS has reported several outbreaks of dengue, chikungunya and influenza virus infection. The first outbreak investigation of VRDL, SVIMS happened in the month of September 2016 when, many students in the Adalur, Nandalur girls hostel, Kadapa (dist.) presented to the nearby PHC medical officer with fever, swelling and calf muscle pain. A team comprising of representatives from different departments visited the hostel and examined the sick students. Appropriate samples were collected and brought to VRDL, SVIMS and tested Results were communicated to the respective health authorities for further action. In the year of 2017, a total of 41 outbreaks were reported from our VRDL. These were due to Dengue virus (11), Chikungunya virus (6), Influenza virus (23) and both dengue & chikungunya co infection (1).

SVIMS VRDL was identified as the one and only referral centre for HINI testing in Andhra Pradesh during 2017 outbreak. All the positive results are communicated to respective clinicians and DMHO through telephone and or e mail for further action.

To overcome the problem of shortage of reagents we standardised in-house the PCR assay in our lab itself and could continue testing for influenza virus even when there was no supply of reagents from NIV, Pune. Another major problem we faced during the influenza outbreak was the non-functioning of the real time PCR equipment. However we could provide continuous services, with the constant support of the administration. The influenza outbreak taught us certain lessons such as to have a backup plan in terms of alternative equipment in case the primary equipment fails and also to keep reserve of reagents as outbreaks start suddenly and endure very fast and the situation may become uncontrollable if you are not ready beforehand.

Dr. Usha Kalawat,

Professor, Clinical Virology,
Principal Investigator—DHR-ICMR-VRDL,
Department of Microbiology

MENTORSHIP

THE NEED OF THE HOUR

My early concept of a good teacher was a multifaceted personality, with academic excellence, who could teach with authority, maintain discipline and command respect. In my career initiated at Sri Ramachandra Medical College & Research Centre Chennai (SRMC & RI), as an Assistant Professor, I faced a sea of students both undergraduate and post graduate students belonging to 14 different courses. God bless my soul, it was a marathon with the stress of having to take 2-3 classes per day for different courses, four days in a week with afternoon practicals as the finishing touch. I spent almost every waking hour preparing for the academic schedules. I had my own nagging doubts regarding the content and manner of my delivery- "was I too fresh to

impress". But all that disappeared when one of the students came over to my room after one of my classes to compliment me for delivering an effective lecture. It was then that the horizons of my understanding of a good teacher expanded. I had not quite examined my role as a "good" teacher, but rather considered myself as a happy go lucky person with a sincere attitude towards my job. I recollected my school days - all of my 12 years at Sacred Heart Matriculation Higher Secondary School, Church Park, Chennai. As a student I was in awe of a few teachers, who I then understood have moulded my personality by their wit, love and affection. The student's compliment on that day was a reflection, an echo of my love for my school teachers. That day I resolved to give all the good that I had received, for it is in giving that we all grow. A quote by Madeleine L'Engle "Nothing, no one, is too small to matter. What you do is going to make a difference" says it all.

What our teachers gave us so heartfully is today being defined as "mentorship", which Wikipedia describes as "a relationship in which a more experienced or more knowledgeable person helps to guide a less experienced or less knowledgeable person". I would like to propose the following pointers for a good mentor:

”

- guide but don't control-
- be there but don't decide-
- let the question, answer itself-
- let the answer, question itself-
- give examples, don't impose-
- be firm but not harsh-
- be bold but not rash-
- ready to fail but never to give up-
- prepare for the best but accept the worst-

In the process of teaching, I have learnt a lot. I have played my role as a mentor for an MBBS student with regard to guiding a project for ICMR short term studentship. The below certificate says it all, but the feather in the cap is the transformation of the student in a very short time into a more confident professional, who I can say "exceeded expectations" taking into account that she was into her second year of MBBS at the time of study.

Now I strongly believe that there are no right and wrong decisions but only events which would anyway have occurred, so take them in your stride, learn from them and move on.

THANK YOU

Dr.M.M.Suchitra

Associate Professor,
Dept of Biochemistry.

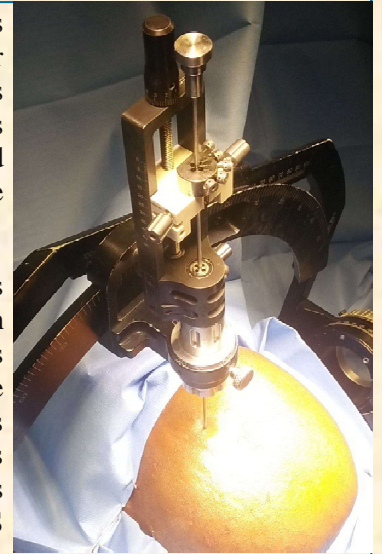

EVIDENCE BASED PRACTICE – A CORE CONCEPT TO ACHIEVE QUALITY OF NURSING CARE

Evidence Based Practice (EBP) leads to higher quality care, improved patient outcomes, reduced costs, and greater nurse satisfaction than traditional approaches to care. EBP has seven steps. They are numbered zero to six. **Step zero** is to cultivate the spirit of inquiry. **Step 1** to ask clinical questions in PICOT format. Inquiries in this format are (P) population, (I) intervention (C) comparison (O) out come and (T) time. For example In acute care hospitals (patient population), how does having a rapid response team (intervention), compared

SVIMS : A Destination Centre for DBS

Deep brain stimulation is an established treatment for movement disorders, such as essential tremor, Parkinson's disease and dystonia, and more recently obsessive compulsive disorder.

SVIMS Neurosciences launched holistic approach for movement disorders and DBS in July 2017. Since then twenty patients suffering from various movement disorders benefitted from DBS procedure at SVIMS.

Deep Brain Stimulation procedure

SVIMS Neurosciences conducted First ever “ Live workshop and symposium on DBS” in India.

Dedicated team work and holistic approach made SVIMS a destination centre for movement disorders and DBS within a short span of time.

Congratulations are owed to Drs. B. C. M. Prasad & Dr.V.V.Ramesh Chandra of Neurosurgery, Dr. T. Naveen of Neurology and the team of anesthesiology, nursing, physiotherapy & other staff.

with not having a response team (comparison) affect the number of cardiac arrests (outcome) during a three month period (time)? **Step 2** search for best evidence by locating relevant articles in a massive research data base . **Step 3** critically appraise the evidence, to determine which are most relevant ,valid, reliable and applicable to the clinical question. **Step 4** integrate the evidence with clinical expertise and patient preferences and values .Research evidence alone is not sufficient to justify a change in practice. For example, say there is a strong body of evidence showing reduced incidence of depression in burns patients, if they receive eight sessions of cognitive behavioural therapy prior to hospital discharge. But budget constraints may prevent the hiring of a therapist to offer therapy. This resource deficit hinders the implementation of EBP. **Step 5** - evaluate the outcomes of practice decisions or changes based on evidence. **Step 6** - disseminating EBP results.

Dr. A.Padmaja,

Professor, College of Nursing

ON A GLOBAL PLATFORM

Prof. Ravikumar invited as a Visiting Scholar to Harvard

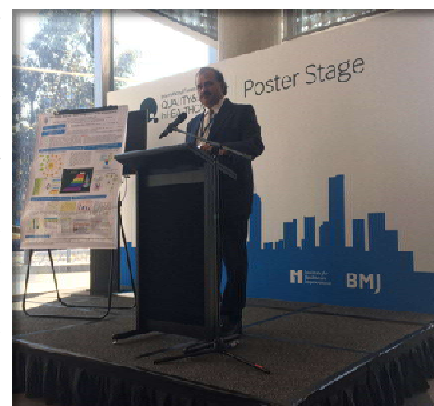

Prof. T.S. Ravikumar conducting seminar at Harvard Global Health Institute: “Engaged Leadership to Transform the Quality of Care in Healthcare- Lessons from India”

Dr. T. S. Ravikumar, Director cum Vice Chancellor, SVIMS was the “Invited Visiting Scholar” to Harvard between July 17-19, 2018. During this Visiting Scholar program, he gave a seminar to the greater Harvard community, entitled “Engaged Leadership to Transform the Quality of Care in Healthcare:Lessons from India”. One-on-one meetings were held with several Harvard faculty, and a round table discussion was organized to identify key areas for focus in transforming health care in India through global collaborative engagement.

During the seminar that Prof .Ravikumar led, lessons learned from different countries were shared, to identify successes and barriers, with focus on India. The experience from JIPMER and SVIMS were analysed by Prof. Ravikumar in the context of Global experience of Harvard faculty, so as to enrich mutual learning. One area for mutual cooperation resulting from this discussion is to incorporate new ideas into the next iteration of Harvard X Massive Online Open Course (MOOC) of “Improving Global Health through Quality”. This will be made available to all healthcare providers and students in India. The second area for collaboration is in the development of National Patient Safety Cell. Prof. Ravikumar has submitted a proposal to ICMR Department of Health Research. Harvard Global Health Institute (HGHI) Director Prof. Ashish Jha lauded the proposal and extended the expertise of Harvard in shaping a robust patient safety program, for scaling up. The third area for collaboration finalised is in the realm of Population Health. “Harvard has significant depth and breadth in this aspect, and it will be an opportunity to harness their collective expertise for developing longitudinal population cohorts, that will yield multidecade understanding of disease transitions in populations of India” according to Prof. Ravikumar. While Prof. Ashish Jha will explore a coalition of experts from Harvard, Prof. Ravikumar expects to put together an Indian team to enable this population science project. Short term, intermediate & long term goals were discussed and funding mechanisms were elaborated. At the conclusion of his visit, the HGHI group presented Prof. Ravikumar with a memento.

SVIMS paper presented at International Forum on Quality & Patient Safety in Healthcare

The premier quality and patient safety Global forum was held in Melbourne, Australia during 10th – 12th September,2018 bringing together world leaders in healthcare quality. About 1700 delegates have attended from all continents. In addition to several workshops, all presentations were selected in poster format and select few were presented on stage. SVIMS work in patient safety was chosen for presentation on 11th September,2018 on stage-Prof. T.S.Ravikumar SVIMS VC presented the paper “Safe Practices Save Lives Model, using Multiple Wedges of Improvement” as innovation in patient safety. This work done by system wise quality managers. A Total of 70 members, one from each department and domain worked on this for over 2 years. The innovation characteristics for which the paper was selected were: leadership driven & grass roots based; bidirectional rapid cycle learning; iterative self improvement using multiple wedges adapted from sustainable model for climate change; voluntary public reporting of metrics; and real-time actionable patient experience of care reporting system.

Dr. T. S. Ravikumar, Director cum VC, SVIMS presenting a poster on “**Safe Practices Save Lives” Model: Using Multiple Wedges of Improvement** at the International Forum on Quality and Safety in Healthcare, Melbourne, Australia.

Dr. Ravikumar shares this accolade with all members involved in quality and patient safety movement at SVIMS. “Quality is Job 1, and Patients are First & the Center in Healthcare” says Dr. Ravikumar.

The hospital mortality has reduced by 22% during the last 2 years. SVIMS has the most robust public reporting system for quality of care, never events, mortality, equipment status, healthcare associated infections and many more in the pipeline. The patient experience of care that was launched a few months ago is addressing patient feedback with corrective actions in rapid timeframe.

Member of Parliament Sri. Manoj Rajoria Visited SVIMS

Dr.M.Hanumantha Rao, Director cum Vice Chancellor (i/c), SVIMS felicitating Sri. Manoj Rajoria, MP (Lok Sabha) during the meeting held on 12.09.2018 at SVIMS.

Sri.Manoj Rajoria, Hon'ble Member of Parliament (Lok Sabha), Convener/Chairman, Hon'ble Parliamentary Standing Committee, Health & Family Welfare, Govt. Of India & Member, AIIMS visited SVIMS on 12.09.2018. In this connection a meeting with all the SVIMS faculty was convened at SVIMS Committee Hall. During the meeting, SVIMS Director cum Vice Chancellor (i/c), Dr. M. Hanumantha Rao presented a brief overview on the genesis of SVIMS. He underlined the major achievements of SVIMS in the past 25 years. During the meeting Sri. Manoj Rajoria said that "SVIMS has been providing excellent health care services to thousands of people and is also consistently improving its performance in terms of service. All this have been achieved by the organization only thorough the dedicated faculty and staff who are striving restlessly for its development".

' Ventilatory Management of Neonatal & Paediatric Patients' - Workshop Conducted

Workshop on Ventilatory Management of Neonatal & Paediatric Patients in progress at SVIMS

SVIMS, Department of Paediatrics conducted a workshop on 'Ventilatory Management of Neonatal & Paediatric Patients' on 17th & 18th September, 2018 at SVIMS-SPMC(W) Hospital. Prof. S. Mahadevan, MD, Ph.D., Former Professor (SS) of Paediatrics, JIPMER, Division Head Emergency & PICU, JIPMER Women &

Children Hospital was the core faculty of this workshop. Prof. S. Mahadevan, who is an alumnus of JIPMER and Madras University, has an experience of 39 years in the areas of teaching and research in paediatrics.

Dr. Satish M.D, DM (Ped. Critical care) and Dr. Nikhil Kedia., M.D, DNB, PDF (Ped.Critical .care) from Pondicherry imparted training in paediatric emergency care during the two day workshop.

ADVANCED LUNG CLINIC

Inaugurated

Dr.Vaidehi Kaza inaugurating the "Advanced Lung Clinic" on 23rd July, 2018. Dr. Hanumantha Rao, Director cum VC (i/c) (center), SVIMS, Dr.Alladi Mohan, HoD, Department of Medicine (Right) can also be seen in the photo.

A special clinic for patients suffering from lung disease in advanced stages has been launched in SVIMS. The "Advanced Lung Clinic" was established in SVIMS in collaboration with university of Texas South Western Medical Centre under the leadership of Dr T.S.Ravikumar, Director cum VC, SVIMS. Dr. M. Hanumantha Rao, Director cum VC (i/c), Dr Alladi Mohan, HoD, Medicine and Dr Vaidehi Kaza, Assoc. Professor, Internal Medicine and Lung transplant expert, UT South Western Medical Center, Texas, USA inaugurated the "Advanced Lung Clinic" on 23rd July,2018.

"Advanced Lung Clinic, a milestone in the development of the **Institute of Lung Disorders** at SVIMS is one of the 10 institutes of excellence articulated in the Roadmap for SVIMS, after Dr. Ravikumar took over as director. Upon his invitation, Dr. Vaidehi Kaza from University of Texas, Dallas, USA was at SVIMS to launch this clinic. Dr. Ravikumar thanked Dr. Kaza, and together the two institutions will develop this outpatient services for the population with special needs to maintain their '*Breathing Health*' said Dr. Ravikumar.

This clinic is intended to treat the patients suffering from severe Chronic Obstructive Pulmonary Disease (COPD), Interstitial Lung Disease (ILD), severe uncontrolled bronchial asthma, bronchiectasis and pulmonary arterial hypertension (PAH). Patients suffering from these disorders will benefit from multidisciplinary team approach involving physician, cardiologist, cardio-thoracic surgeon, psychiatrist, physiotherapist and nutritionist. The goal of this clinic is to provide a comprehensive multidisciplinary care to patients suffering from advanced lung diseases along with investigations like six minute walk test, pulmonary functional tests, bronchoscopy, HRCT chest, 2DEcho and right heart catheterization test at one place.

The two day workshop also promoted new knowledge in neonatal care, especially ventilator management and helped in upgrading the skills of paediatricians with regard to the recent developments in paediatric care.

15 doctors and 5 nursing staff from different departments participated in this workshop.

SVIMS commissions high end Simulators towards Quality Improvement & Patient Safety

Workshop on simulation of a cardiac arrest patient in progress at SVIMS- Sri Padmavathi Auditorium on 19.09.2018.

On 19th September 2018, SVIMS as part of Simulation Week, unveiled the newly commissioned phase II set of simulators and conducted team training workshop using the best of the breed, high-end **SIM MAN (3G)**. At a total cost of nearly Rs.4.5 Crores, SVIMS commissioned High Fidelity Adult, Birthing & New Born simulators along with Mannequins for various procedures, Examination models & Debriefing systems. "The core of the program is designed around innovation in education, skill development, team training in order to improve quality in many realms and assess impact on outcomes in patient safety" according to Prof.T.S.Ravikumar, Director cum VC, SVIMS and the architect behind "Safe Practices Save Lives" model that is getting high acclaim. "This changes the post paradigm of learning while caring for the patient, into the new paradigm of the health care provider being ready to provide optimal care for the patient after the learning curve in the simulator" opined Prof.Ravikumar.

SVIMS is going to develop a curriculum in simulation which consists of nearly 50 common clinical scenarios from various disciplines such as adult resuscitation, difficult labour resuscitation, new born resuscitation, various life threatening injuries in a trauma patient etc.

Laerdal Foundation who is the supplier of all simulation equipment to SVIMS, donated high end simulators for various procedures worth of 50 lakhs as part of their corporate social responsibility. Laerdal Foundation also supplied more than 200 limited use mannequins in the first phase for conducting community CPR training at free of cost.

National Conference on Current Perspectives in Clinical Pharmacy and Pharmaco therapeutics Conducted at SVIMS

Dr.T.S.Ravikumar, SVIMS Director cum VC, SVIMS and other dignitaries releasing the CD's at the conference. (Right) Faculty and students of SVIMS and other institutions at the National Conference.

A two day national conference on "Current Perspectives in Clinical Pharmacy and Pharmacotherapeutics" was jointly conducted by Department of Pharmacology, SVIMS and Seven Hills College of Pharmacy on 16th & 17th Aug -2018. With more than 400 delegates, the conference was inaugurated on 16-08-2018 at SVIMS-Sri Padmavathi Medical College for Women. Mrs. Sugunamma, MLA, Tirupati was the Chief Guest and in her inaugural speech she insisted the need for collaboration between doctors and pharmacists in providing effective health care to all patients.

Dr. T. S. Ravikumar, Director cum VC, SVIMS addressed the delegates and emphasized about the increasing role of pharmacists in health care delivery systems. He further made a mention on medication errors and motivated the delegates to work on developing novel strategies to decrease medication errors in the Indian Scenario.

Dr. Jayasree Pillarisetti Visited SVIMS

Performed Complex Cardiac Surgeries

Dr. Jayasree Pillarisetti being felicitated during the programme organized at Sri Padmavathi Auditorium.

SVIMS, Department of Cardiology, conducted a workshop on 30th and 31st August, 2018. Dr. Jayasree Pillarisetti, an Electrophysiologist from University of Health Sciences, San Antonio, USA, attended the workshop and performed complex cardiac surgeries. She performed three cases of Cardiac Resynchronisation Therapy (CRT), three cases of Implantable Cardiac Defibrillator (ICD) and three cases of 3D cartomapping in the workshop.

All the patients had severe left ventricular dysfunction and recurrent heart failure. The patients were poor and the procedures were done under Rastriya Aarogya Nidhi (RAN) Scheme.

SVIMS presented a Certificate to Dr. Jayasree Pillarisetti in appreciation of her expert consultancy services for complex cardiac arrhythmia and heart failure patients.

Rotary Club Raises funds for 'Pink Bus'

SVIMS Director Dr. T. S. Ravikumar and Registrar Dr. T. C. Kalawat exchanging MoA with Members of Rotary Club on 12.05.2107.

Supporting the SVIMS cancer initiative for women "Pink Bus" the Rotary Club of Tirupati raised funds to purchase a high end digital mammography under Global Grants Project. Madam Rtn

Asha Parsannakumar as rotary district governor 2017-18, and Rtn Badriprasad DRFC of RI Dist. 3190 recommended for Global Grant towards cost of Digital Mammography. The project was approved by Rotary Foundation International and USD \$ 142,521.00 (One Lakh Forty-Two Thousand Five Hundred Twenty –one US dollars) was granted towards the cost of digital mammography.

"We are pleased to participate in women's cancer initiative, a mega project of SVIMS by donating sophisticated digital mammography as suggested by Director cum VC of SVIMS Tirupati" commented the members of Rotary Club of Tirupati.

According to SVIMS VC Prof. T. S. Ravikumar, himself a cancer specialist, this timely gesture will provide impetus to the SVIMS Rayalaseema Women's Cancer Initiative. SVIMS & Rotary will jointly launch community level women's cancer awareness campaign throughout the year, dove-tailing with the rural & other outreach camps. In addition to breast cancer, women will be screened for other common cancers such as that of cervix & oral cavity, using a 'bundled screening' strategy. Dr. Ravikumar explains that, with the overarching goal of reducing the 'burden of cancer' in the region of Rayalaseema, several concurrent initiatives will be setup towards prevention & early detection of the above cancers, using time – defined targets: two year goal of diagnosing cancers in stages I & II (rather than III & IV as it is happening now); five year goal of increasing 5 year survival; and 10 year goal of overall decrease of "cancer burden" using several outcomes indicators such as DALYs, YLL, GDP contribution etc.

Dr. NTR Vaidya Seva Trust Places SVIMS Atop of All Government Teaching Hospitals in Andhra Pradesh

SVIMS Faculty presenting "Best Teaching Hospital" award and certificate to Dr. T. S. Ravikumar, Director cum VC, SVIMS on 2-08-2018

In a formal meeting organized at Sri Padmavathi Auditorium, SVIMS on 2-08-2018, Dr. T. S. Ravikumar, Director cum VC, SVIMS presented Dr. NTR Vaidya Seva Awards to different departments of SVIMS. SVIMS won the "Best Teaching Hospital" award among all the government institutions

in Andhra Pradesh and the same was presented to Dr. T. S. Ravikumar by all the faculty of SVIMS. Dr. T. S. Ravikumar presented "Best Performing Specialty" awards to 7 specialties of SVIMS in which departments of *Neurosurgery & Rheumatology stood at 1st place and departments of CT-Surgery, Radiation Oncology, Surgical Oncology, Medical Oncology, and Urology stood at 2nd place.* SVIMS was presented these awards for providing exceptional health care services to the patient under Dr. NTR Vaidya Seva Scheme.

SVIMS Lauded for Developing EXCELLENCE IN TRAUMA CARE

International Trauma Tele-Grand Rounds in progress on 29-06-2018

Doctors at SVIMS reached new heights in patient care and received international accolades for effectively managing a seven year old boy who sustained severe injuries due to a road accident on 20/05/2018. With the inception of triage system two years

ago at SVIMS and with the innovative concept of trauma team, medical experts from different disciplines have effectively coordinated and treated the child within the golden period. Subsequently, by invitation, this case was presented in the International Trauma Tele Grand Rounds held on 29/06/18. Doctors and health care personnel from 12 countries participated in the tele-grand rounds. With the coordinated and tireless efforts of a team of Emergency Physicians, Trauma Surgeons, Neurosurgeons, Orthopedicians, Cardiothoracic surgeons, Anesthesiologists, Physiotherapists and Nursing personnel the child was brought out from the verge of death. The way in which the child was managed was well appreciated by other doctors and received a **standing ovation** after the live presentation.

19th Annual Conference of Endocrine Surgeons organized at SVIMS

Prof. Sivapadam Vittal addressing the gathering during the 19th Annual Conference of The Indian Association of Endocrine Surgeons.

19th annual conference of The Indian Association of Endocrine Surgeons (IAESCON-2018) was held at SVIMS on 28 & 29 September 2018. SVIMS, Dept. of Surgical Oncology, General Surgery and Department of Surgery

– SVMC have jointly organized the event under the leadership of Dr. Manilal, Associate Professor, Surgical Oncology as the Organizing Secretary for this conference.

About 300 delegates from different parts of India including the Founder President of IAES, Padma Shri awardee Prof. S. Vittal from Chennai participated in the two day conference. International faculty from Singapore and Sri Lanka also participated.

Dr. Dilip S Gode, President, Association of Surgeons of India was the Chief Guest at the conference. Dr.T.S.Ravikumar, Director cum VC, SVIMS, Chief Patron, was the Guest of Honour for the inaugural program which was held on 28th September at 12:30 PM. “This meet has brought together international expertise in Endocrine Surgery and I am proud to be the Chief Patron. I hope that the interactions would set a platform for the cooperative group clinical trials, comparative effectiveness research in Endocrine Surgery” opined Dr. T. S. Ravikumar.

World Physiotherapy Day Celebrated

Dr.T.S.Ravikumar, Director cum VC, SVIMS garlanding the statue of Ms.Mary Mac Millan, Founder of Physiotherapy.

World Physiotherapy Day was celebrated at SVIMS on 08.09.2018 at SVIMS College of Physiotherapy. Dr.T.S.Ravikumar, SVIMS Director cum VC was the Chief Guest at the program.

SVIMS College of Physiotherapy organized a program on “Physical Activity to improve mental health’ to educate the general public about the importance of physical activity.

CME on ‘Ergonomics for desk - job workers’ conducted

Dr.K.Madhavi, Principal, College of Physiotherapy delivering a lecture during the CME programme.

College of Physiotherapy, SVIMS University organised a CME on “Ergonomics for desk - job workers” on behalf of Indian Association of Physiotherapy (Women Cell) nationally on 05.08.2018, Sunday in Sri Padmavathi Auditorium, SVIMS, University, Tirupati.

The CME featured two renowned speakers: Dr. K. Madhavi, Principal, College of Physiotherapy, SVIMS and Dr. Reena, Senior Physiotherapist from Madanapalli. The CME focused on work place problems and how physiotherapist can be a curtail to mitigate this problem and prevent musculoskeletal ailments, in addition to increasing productivity.

SVIMS Director cum Vice Chancellor, Dr.T.S.Ravikumar in his speech highlighted the role played by physiotherapists: early mobilization and chest clearance in all hospitalized patients, rehabilitation of patient with various specific illnesses such as orthopedics, neurology, cancer, cardiac diseases etc., and helping in coordinating early discharge and improving the quality of life post discharge. As the day was the ‘National friendship day’ he called on all to be a true friend of SVIMS and help in upliftment of the health of the public it serves. He exhorted alumni fraternity to be brought into the fold of Friends of SVIMS.

Dr.K.Madhavi and Dr.Reena thanked Honourable Chief Minister Sri. Nara Chandra Babu Naidu Garu and Chief Secretary Sri.Dinesh Kumar Garu for their contributions in declaring state physiotherapy council.

SVIMS Organized Rally to Create Awareness on Organ Donation

Dr.Hanumantha Rao, Director cum VC (i/c), SVIMS and Dr. Siva Kumar, Sr. Prof. & HoD, Nephrology flagging off the rally on 10.08.2018

As per the guidelines of Jeevandan Trust, Government of Andhra Pradesh and as part of organ donation awareness week starting from 6th August -13th August 2018, SVIMS organized a rally to create awareness on organ donation among the general public. Dr. Hanumantha Rao, SVIMS Director cum VC (i/c), Dr. T.C. Kalawat, Registrar, SVIMS and Dr. Siva Kumar, Sr. Prof. & HoD, Nephrology flagged off the rally.

Students from Colleges of Physiotherapy and Nursing and Sri Padmavathi Medical College took out a rally raising the slogans of organ donation from SVIMS campus to Mahathi Auditorium.

Orientation Programme Conducted for Freshers

Dr.T.S.Ravikumar, Director cum VC, SVIMS Addressing the MBBS students during the orientation programme. (right) MBBS students at the orientation program.

SVIMS University organized orientation programme for the newly joined MBBS and PG students on 27-08-18 and 18-09-18 respectively.

MBBS Students:

The Orientation program for MBBS students was organized at SVIMS – Sri Padmavathi Medical College for Women. The Orientation programme took place for three days covering various topics in Medicine.

Dr. T.S.Ravikumar, Director cum VC, SVIMS, Chief Guest of the programme welcomed all the new students and congratulated them for joining SVIMS-SPMC(W), one of the prestigious medical colleges of Andhra Pradesh. He highlighted the importance of setting of higher goals and working hard to achieve them. “SVIMS-Sri Padmavathi Medical College for Women is ragging free and provides a healthy environment for students to learn and nurture their skills” according to Dr. T. S. Ravikumar. In his speech he stressed the need for physical exercise for being stress free.

The Principal of Sri Padmavathi Medical College for Women in his speech advised the students to concentrate on studies with a peaceful mind set, without any fear of studies.

The students and parents and various Heads of Departments of Sri Padmavathi Medical College for women and Hospital attended the inaugural session.

PG. Students:

Orientation programme for PG students was organized at SVIMS—Sri Padmavathi Auditorium. SVIMS Director cum VC, Dr. T. S. Ravikumar welcomed all the students who have newly joined in MD, DM and MCh courses.

Dr.T.S.Ravikumar, Director cum VC, SVIMS and other faculty with newly joined PG students on PG Orientation program-2018.

“SVIMS has been progressing well and attained distinction not only as a good medical institute but also as a good teaching hospital. We have been striving hard to place the institute among the top 10 medical institutes in the country”.

He advised the new PG’s to follow the Vision, Mission and Values of SVIMS and work hard to give best possible treatment to the patients.

He asked the new residents to come forward to join in SVIMS initiatives and work for the development of the organization.

The A&T OF GIVING

SVIMS Takes another Major Move Towards Patient Safety

Highly Equipped Ambulance Donated to SVIMS

Sri. Sathpal Mehra handing over the ambulance keys to Dr.T.S.Ravikumar, Director cum Vice Chancellor, SVIMS.

Supporting SVIMS initiative towards patient health, safety and health care quality Sri. Sathpal Mehra, Smt. Rachna Mehra and family from New Delhi donated a highly equipped ICU

ambulance worth Rs.20,00,000 to SVIMS in a function organized at SVIMS campus. The donation was made thorough Tirumala Vijaya Bank. Sri. Sanjeev Mehra is the first donor of SVIMS and his family has been contributing necessary funding for the development of SVIMS since 1993 and has donated more than Rs.1.58 cr so far.

“SVIMS goal is not just to transport the patient in the ambulance but to give the patient proper coordinated treatment throughout the episode. SVIMS Emergency remotely instructs necessary treatment to be given to the patient at the scene of emergency or accident until reaching the destination center” says Dr. T. S. Ravikumar, Director cum VC, SVIMS. “With an aim to achieve patient

safety SVIMS also initiated Community CPR programme. More than 18,000 people in Tirupati are now “CPR Ready” and we aim to train the entire population of Chittoor in CPR. Making the bystander an effective resuscitator can save many lives in the diamond minutes and the golden hour” opined Dr.T.S.Ravikumar.
